

TomCat 6.2

A Boat for All Reasons

Introducing the TomCat 6.2 - a new concept that combines the exceptional sailing performance of a modern lightweight catamaran with the convenience, comfort and style of a power runabout. Get set to turn some heads while you enjoy the TomCat experience!

Versatility

- Day Sailer
- Trailerable Sport Cruiser
- Single hand or take a crew
- Power and sail

Performance

- Catamaran Speed
- Agility
- Shoal Draft

Comfort

- Cushioned Seating
- Dodger protection from sun and rain
- Flat smooth ride
- Bow trampoline

TomCat *A Boat For All Reasons*

TomCat can be sailed single handed, or can carry eight passengers comfortably.

The Science of Catamarans

Physics tells us, and experience proves, that two, long, narrow hulls are more easily driven through the water than one short wide one with the same displacement. The cat's wide stance gives stability, easy motion in waves, and a large area for passengers and cargo. Modern materials and construction methods make the whole structure light and strong. From beach cats to high-tech ocean racing machines, the move is to catamarans.

Excitement, enjoyment and relaxation. There is nothing like being on the water for relief from the heat and a change from our usual routine.

If you want to take family and friends for the day and have a picnic at a secluded anchorage or your favorite beach . . . TomCat can do that.

If you want to drive to a far-off cruising ground, TomCat can go on the highway with you.

Or if you want to fly down the bay just for the sheer fun of sailing fast, TomCat can do that too.

Quality, performance and good looks . . . TomCat style.

For Camp and Cottage

TomCat is ideal for your retreat on the water. Sailors looking for excitement will be challenged by her speed and agility. When the wind is lighter, you can take a leisurely cruise, stop to have a swim or catch a fish.

Experience the magic of a quiet moonlight sail with family and friends. The large cockpit area transports up to eight adults in safety and comfort. TomCat's comfort and versatility can be enjoyed in many ways.

For Day Sailing

Day sail in comfort while enjoying the speed and easy motion of her twin hulls. Sit in the shade of the Bimini, or enjoy the sun on deck.

When the wind comes up combinations of crew hiking, reefing and optional water ballast keep TomCat stable and moving fast.

If the wind dies or time runs out, motor home at 8 to 10 knots with an economical 9.9 hp out-board.

TomCat is at home on a mooring, at a slip, or dry sailed from the trailer.

The north channel in summer and the Florida Keys in winter? TomCat makes it possible.

For long distance sport cruisers, TomCat has 30 gallon water ballast tanks in each hull. With this optional system, you can carry on safely in higher winds and waves without spending the whole day hiking.

TomCat can be laid out with seating and sleeping arrangements in the cockpit and trampoline. There is ample storage in the hulls and aft compartments.

Whether you are a cottage owner who wants to avoid big marina bills or an adventurer who enjoys a new sailing challenge, you need a boat that is transportable. TomCat has a custom trailer that fits your needs.

Naturally, TomCat's 11' beam can't go on the highway, so she has to come apart. Extension racks with rollers guide her on to the trailer. Take out a few bolts, winch up the bridgedeck, slide the hulls underneath, and you have an 8'-wide highway legal load.

The bridgedeck travels upright and motors, tanks, batteries and storage can be left in place. The hull storage compartments are accessible for all of your gear.

The Sport Cruising option includes a dining table, camper top and sleeping accommodations.

"An exciting cruising cat with powerboat convenience . . ."

John Turnbull, Boat for Sale Magazine

Motoring with TomCat is as familiar as with your standard runabout. Wheel steering from a protected helm is comfortable and secure. When you want to sail, all sail controls are operated from the cockpit. Twin tillers with internally interconnected rudders, along with main and jib sheets close at hand, make single-handed or crewed sailing easy and enjoyable. High quality six part ratchet main sheet blocks and jib roller furling make for effortless sail handling. A boom vang and full batten tension line can be used to control sail shape and automatic mast rotation provides an efficient sail plan.

If you want to visit a beach, the centerboard and rudder raising levers are close at hand. As the water gets shallow, pull them up and drive TomCat right up on the sand.

On most boats, when the main halyard is released to drop the sail, the boom drops into the cockpit, and yards of dacron engulf you until you get it all under control. Not on the TomCat. The boom is positively supported and lazyjacks guide the sail into tying position.

TomCat has enclosed hulls and the cockpit is well above the water. Rain and spray drain back into the lake where they belong.

Ever try manoeuvring a sailboat at low speed in close quarters? Even with practice it can be difficult and occasionally embarrassing. TomCat steers both the motor and the rudders so you will look like a pro right from the start.

The TomCat rig is standard beach cat, with a rotating mast for upwind efficiency.

TomCat is modular - you can buy a basic boat to keep the cost down, or a complete sail and runabout package. All options can be added to the boat at a later date at our plant.

"TomCat 6.2 can be powered in comfort, serves as a fine swim platform, sails admirably well, is trailerable, and will even take you camping."

Steve Killing, Canadian Yachting

The shoal draft allows you to beach TomCat.

Modules

Basic

Includes molded hulls and bridgedeck, cleats, hatches and access panels.

Fittings

Windshield, lights, interior seating, snap-in trim panels and I/O floor carpet.

Sail Option

Includes rig, sails, furling gear centerboard and rudders, tiller steering

Runabout Option

Includes wheel steering, instrumentation, marine gel cell battery and 9.9 hp long shaft, electric start outboard.

Water Ballast Option

Includes fill and drain controls and indicators for ballast tanks.

Tops and Covers

Many choices available from a Bimini top, a weather protection cover, to a boom tent for overnights. Enquire.

Color Options

Standard boat is white, with grey, teal and hot magenta accents. Other hull and accent colors available.

Trailer

Custom heavy duty galvanized steel trailer with winch, lights etc.

Other options available.

TomCat 6.2 Specifications

Length Overall: 20 ft. 3 in. (6.2 m)

Length Waterline: 20 ft. (6.1 m)

Beam: 11 ft. 2 in. (3.4 m) (launch)

8 ft. 0 in. (2.5 m) (trailer)

Weight: 850 lb. (386 Kg) plus motor

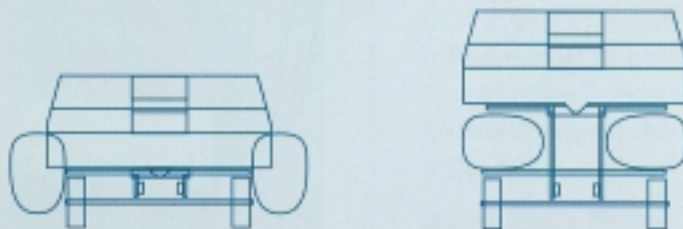

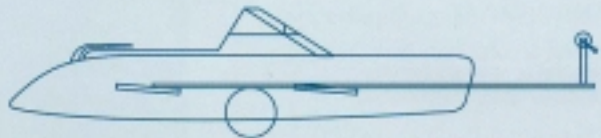

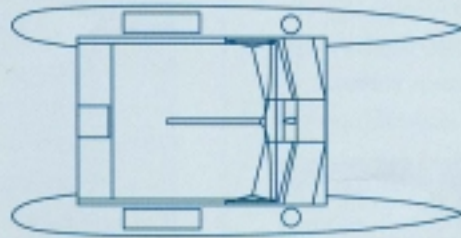

Draft: 8 in. (0.2 m) boards up

3 ft. 6 in. (1.1 m) boards down

Sail Area: 210 sq. ft. (18.9 sq. m)

Construction: Fibreglass/Foam Core sandwich composite. Vacuum bag lamination. Aluminum spars and stainless steel wire rigging. Tempered glass windshield.
